CLIC
Critical Limb Ischemia Course

MARCH 21ST & 22ND 2019
PADUA ITALY

www.cli-courses.com
The endovascular treatment of critical limb ischemia (CLI) and diabetic foot has become an important and promising approach for revascularization of femoral, tibial and foot arteries, improving clinical outcomes and supporting limb salvage. The endovascular therapy for CLI is growing and evolving in terms of therapeutic indications, allowing us to improve our clinical daily practice in diabetic foot treatment and limb salvage.

This therapy is in continuing evolution, and directly related to new technical strategies and devices development. Learning and reviewing the basis, tips & tricks and mastering the techniques and therapeutic indications are essential to manage complex cases of diabetic CLI patients. Actually, most of endovascular specialists are interested in learning and treating this complex condition.

Our main objective is to gather regional and international experts with our audience, to interact and share together, in a very friendly atmosphere. Based on a live-cases model, these courses on a step-by-step approach for each live procedure, supported by didactic discussions about decision making, technical strategies and therapies. The entire endovascular community dedicated to CLI will find in these courses the opportunity to fill the current gaps in the treatment of patients with Critical Limb Ischemia.

We hope to welcome you all in Padua!

MEDTECH EUROPE: NEW CODE OF ETHICAL BUSINESS PRACTICE

With the new Code of Ethical Business practice, direct industry sponsorship will no longer be supported for all Companies members of MedTech Europe. As MedTech Europe announced, “Grants can only be provided to PCOs but never to individuals”. PCOs (for Professional Conference Organizer) are “third-parties of trust”, and they will receive financial support from industries to provide educational grants to practitioners.

Com&Co agency, on behalf of incathlab events, is a PCO operating for CLIC, and as a third-party of trust, has managed your participation to this event providing the means to sustain the CLIC vision of enhancing HCPs (Health-Care Professionals) clinical skills for the benefit of the patient.
